

ÇAK TEKSTİL

Company Profile

ÇAK HOLDING

Founded in Eskisehir in 1948, ÇAK Holding is active in the retail, chemistry, energy, insurance brokerage, construction, production and sale of furniture and decoration products as well as import and export sectors. ÇAK Holding has always proceeded with a focus on constant growth and adding value to its country even as activities took on a global scale. The successful participation in a diverse range of sectors today is the best proof of that. Striving to guide the future with the “Shaping the standards” motto, ÇAK Holding endeavors to participate above world quality standards in every active sector with a human focused approach. Innovative strategies are at the heart of company policy at ÇAK Holding with no effort spared to add value to the country. Developing these approaches with the knowledge that the future is shaped today, ÇAK Holding has always moved to be better and aims to be the best via developing and evolving investments. Aware of the need to be constantly new in the ever changing global context, ÇAK Holding strides towards the future with assured and firm steps with R&D activities and investments.

ÇAK TEKSTİL

The Adapazarı Factory

Besides being the first industry ÇAK Holding participated in, textiles is today foremost among the active industries of ÇAK Holding. Founded in 1994, ÇAK Textile is a company operating in the textiles sector within ÇAK Holding. Possessing the production power to satisfy any needs in the wholesale business, ÇAK Textile reinforces the sector leadership with increasing investments. By the production of private labels, ÇAK Textile continuously grows its share of the global textiles market. Our private label department is specialized in the development and production of customized clothing. ÇAK Textile has an annual production of about 17 million products produced in two factories built according to the latest technology on an area of 150.000 m² in Istanbul and Sakarya. Technology is closely followed and the latest developments improving and enhancing production processes are rapidly adapted into the system.

CAK TEXTILE

We are a trusted and very well experienced company in denim since 1994.

We have been approved in terms of product quality and ethical behaviour by leading international brand audits

The image shows two large, light-colored metal rolling bins with blue vertical stripes, filled with dark denim clothing. The bins are on wheels and are positioned outdoors on a paved surface. In the background, there are trees with yellowing leaves, suggesting an autumn setting, and a portion of a building is visible. The right side of the image is a solid dark blue background with white text.

Private Label Production

Our motivated and professional team can simply convert your idea to an actual denim product. We are very proud that we are making private label productions for major international companies since 1994. We are producing high-quality products to premium brands and retailers all over the world.

Denim Clothing Manufacturing

We have the capacity to produce both small and large quantities of production line orders in denim clothing.

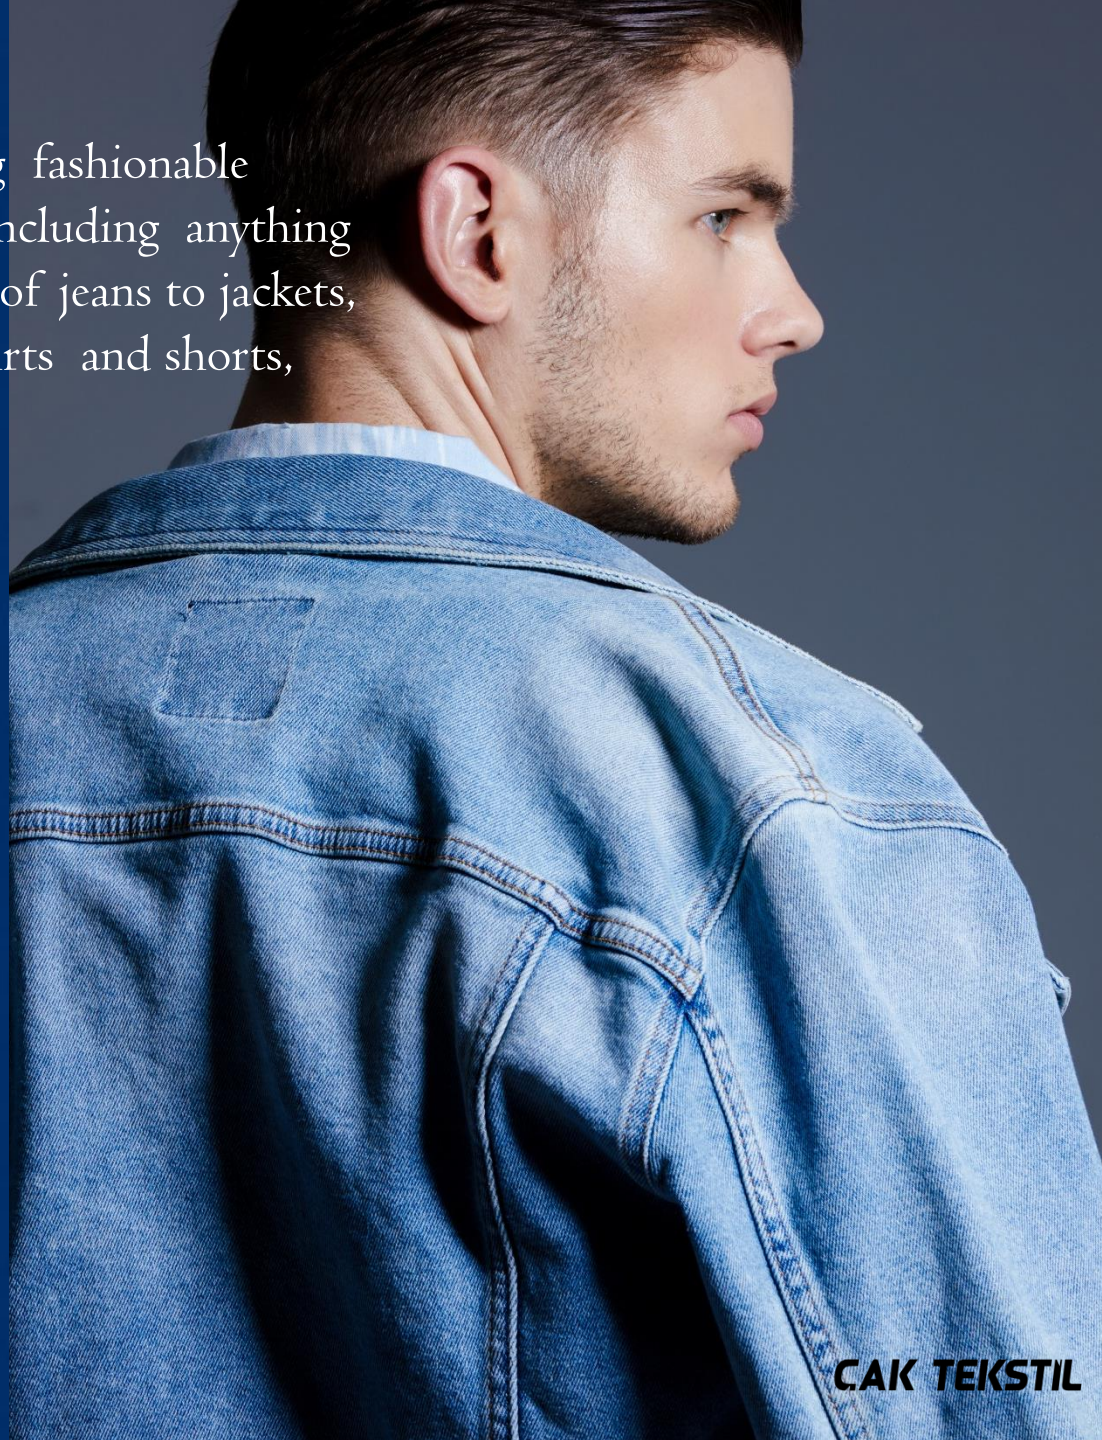

The Private Label Production Process

Product Development & Sampling
Sourcing of Materials and Trims
Pattern Making
Production & Packaging
Quality Control
Logistics

DENIM TRENDS

We are producing fashionable denim clothing including anything from a basic pair of jeans to jackets, dresses, skirts, shirts and shorts, etc...

CAK TEKSTIL

Personal Guidance

Our development team starts from a sketch, evolving your ideas into finished high quality denim goods.

Our in-house design and manufacturing teams work closely with our clients to deliver superior quality products.

PRODUCT DESIGN

We use our knowledge, experience and expertise to make your idea happen. We can also help you at the stage of designing according to global trends. Our jean specialists research and develop the highest quality jeans and bring innovation to the global denim market; latest trends in fit, design and finish.

CAK TEKSTIL

Material Sourcing

Our team will assist you in establishing the correct fabric for your fashion line. The starting point of high quality jeans is fabric, which influences texture and comfort.

We are using high quality and skin friendly denim fabric by cooperating with both Turkish and international world famous denim fabric suppliers.

We only use premium quality trims, labels and accessories.

CUSTOM DESIGN

We work together with you to design and create your very own label. This includes adding custom labels and branding.

CAK TEKSTIL

QUALITY

We believe that quality is one of the most important matters in textiles. With so many different materials and techniques we can always create something which suits your budget without compromising on quality.

Find the Perfect Fit

We are using our denim expertise and knowledge to perfect our fit. Our innovation lab brings innovation to the denim market; latest trends in fit, design, and finish since 1994. We are constantly engaged in R&D to understand the needs of our customers and create fantastic fittings and finishing. Our jeans are not just extremely comfortable, they are designed to flatter every figure to look and feel amazing.

CAK TEKSTİL

Denim Washes

We know that each step in a denim wash makes a big difference to the final garment.

We are offering denim manufacturing with a wide variety of wet as well as dry treatments to get the desired effects. We are experts in a wide selection from raw to vintage denim.

Washing Effects

We are the leading Private Label Denim Jeans Manufacturer with specializing in all kinds of denim washing effects, embroidery and patch work, sequins and bead works and creating desired vintage as well as distinctive looks on denim jeans and other denim outfits.

CAK TEKSTİL

A close-up photograph of blue denim jeans, showing the texture of the fabric and the yellow stitching. The image is positioned on the left side of the slide, with the right side being a solid dark blue background.

Technology and Innovation

Our expert engineers follow the latest technology and adopt it for our production process. Our production is made with the latest technology machines. With our investments, we increase our production capacity day by day.

Our Priority Areas

WATER	ENERGY	EMISSIONS	SOCIAL	ENVIRONMENTAL GOAL
				
Managing water resources	Increasing energy savings	Working for a cleaner world	Improving the livelihood of workers and communities	Ensuring environmental sustainability

Our most sustainable jeans ever;

Organic cotton fabric
Reduced wastewater volumes during
production
Less energy
Washed with eco stones
No harmful chemicals
Laser & nanobubble ozone finishing

JEAN INNOVATION LAB

TECHNOLOGY

Laser Finishing

By incorporating laser technology we are reducing our use of water and energy. It allows for quick production of surface patterns with good precision, desirable effects and creates high productivity.

Ozone Finishing

By incorporating ozone technology we are creating unique specialty looks and reducing environmental impact

Protecting the Environment

We are using waterless denim finishing systems for reducing energy use;

Natural drying

Water-cleaning

Waterless washing

Unique Finishes & Details

Our hand finished denim, which is made by using the best raw materials and expertise, brings to you unique and original finishes.

CAK TEKSTIL

Designing for the Future

Çak Textile guarantees that products do not release substances harmful to human health and are safe from an ecological point of view. We have minimised our carbon footprint by smart sourcing and efficient technologies.

RECYCLED DENIM

We collaborate with business partners who share our commitment to sustainability to ideate and implement new, more efficient upcycling processes.

Recycling is an important theme for us as natural resources become increasingly limited. We recycle denim waste in to new, sustainable jeans.
